

DALI control modules for PCA EXCEL one4all/TE one4all/LED

DALI USB

Computer interface between PC (USB) and DALI

The interface module DALI USB is used to connect Personal Computers directly to the DALI network.

The DALI USB allows to both address and program a wide range of sophisticated DALI functions.

The software can be downloaded from www.tridonicatco.com. Planned middle of 2006.

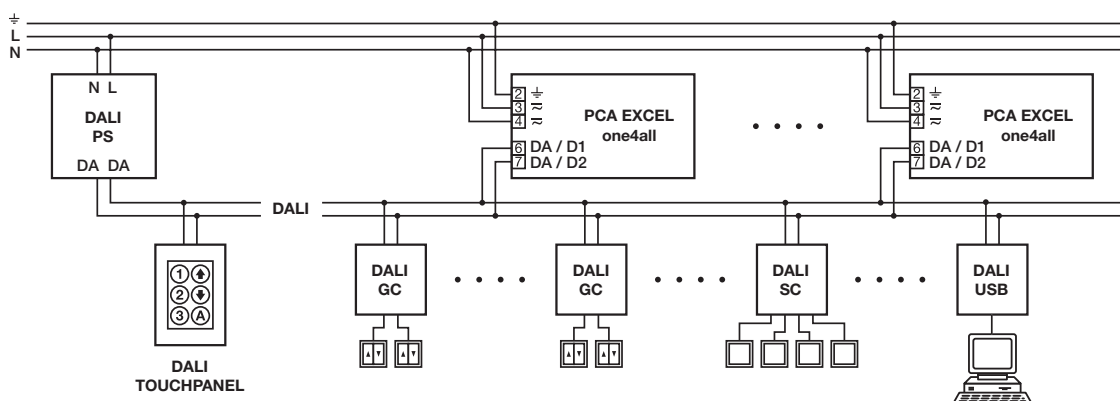

Attention:

The DALI USB cannot be used together with winDIM.

Packaging:

single pack
1 piece

Type			DALI USB
article number			24138923
supply	–	–	via DALI signal line and USB
current	–	mA	6
input	USB (Personal Computer)	–	1
output	DALI	–	1
temperature	permitted ambient temperature	°C	0–50
