

Relay for loads of 250 V 200 VA/500 W or 110 V DC 100 mA

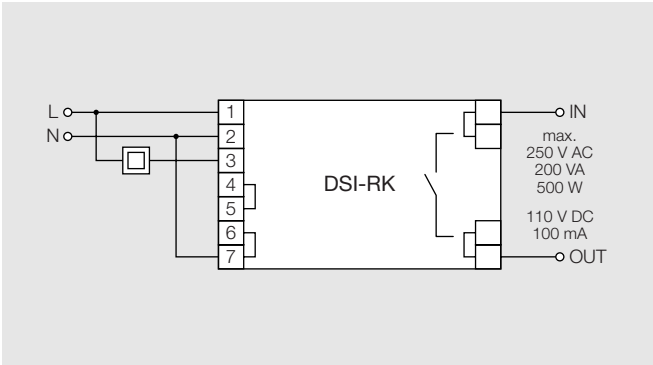

DSI-RK Relay Unit for DSI-installations

- DSI-RK allows the switching of loads like e.g. GLS, magnetic transformers, magnetic ballasts or electronic, non-dimmable ballasts in connection with a **DSI-** or **switchDIM** installation.
 - It is controlled via a DSI-interface or via a push-to-make-switch (switch**DIM**)
 - win**DIM**-software to set up parameters.
- Factory preset:
DSI ≥ 1 → ON
DSI = 0 → OFF

DSI-RK

DSI-RK switch**DIM**

type			DSI-RK
article number:			86449304
voltage:		V	220 – 240
frequency:		Hz	50/60
input:		–	DSI/switchDIM
switchable load:	AC max. 250 V	VA/A	200/2
		W/A	500/2
	DC max. 110 V	VA/A	110/0.1
output:		–	potential free contact
temperature range:		°C	0 → + 60
